Hypermarkets and Supermarkets: Supply Chain Transformation

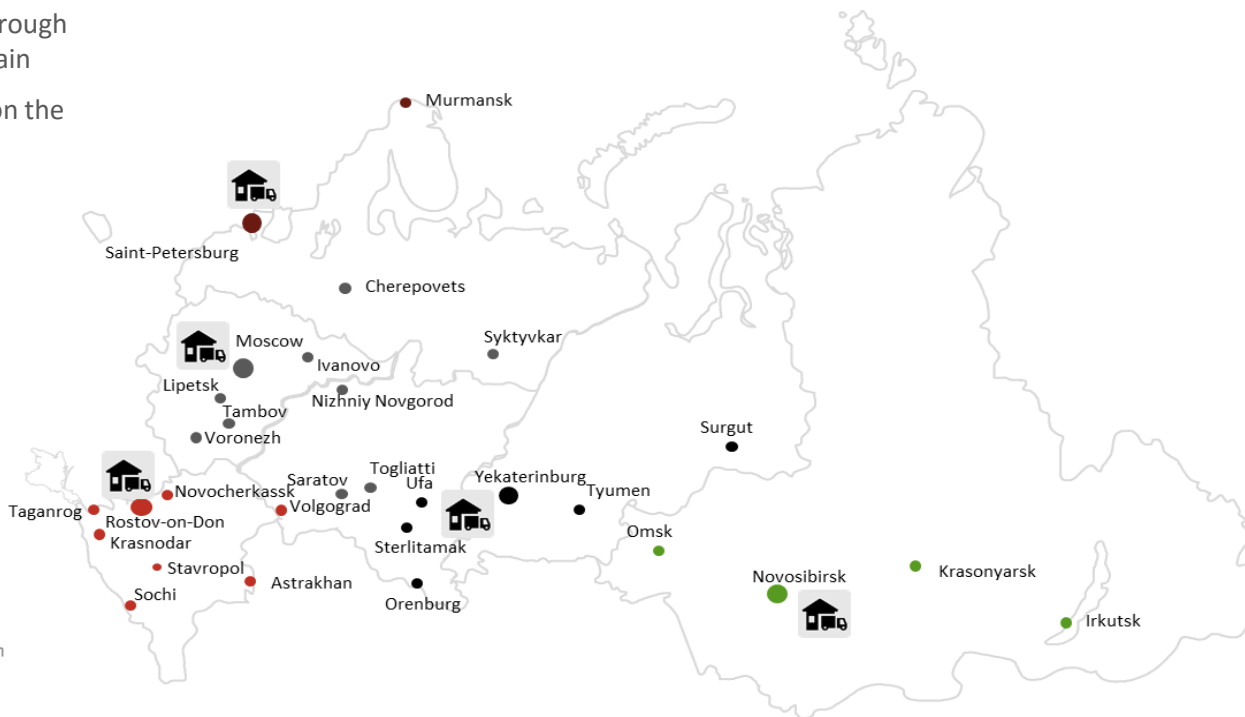

12

O'KEY is transforming its hypermarket/supermarket supply chain by increasing centralization rate: over the two-year period, the Group's supply chain will evolve from 6 small distribution centers to 5 bigger distribution centers, including federal DC in Moscow

Increase in the level of centralization allows the Group:

- To improve inventory turnover and working capital management
- To reduce shrinkage rate through tight control over supply chain
- To reduce personnel costs on the store level

- Cities covered by DC in Rostov-on-Don to be opened in 2017
- Cities covered by DC in Volga/Urals region to be opened in 2017
- Cities covered by DC in Novosibirsk opened in 2014
- Cities covered by DC in Moscow opened in 2016
- Cities covered by DC in St. Petersburg opened in 2015-2016

In 2015, we overhauled our private label strategy to respond to the changing consumer preferences towards more affordable products

- To cater to the price-sensitive customers we developed the concept of the low-price private label “То, что надо” (**That’s What You Need**) replacing no-name private label products: over **500** SKUs introduced as of August 2016
- To address the needs of customers seeking value-for-money we redesigned and relaunched **O’KEY brand**, a superior quality brand that is more expensive than **That’s What You Need**
- **Over 300** SKUs under O’KEY brand available on shelves as of August 2016
- Stringent quality control ensure quality is at the par with branded products, while O’KEY brand items are on average cheaper by **20-30%** than branded products of the same quality
- **85%** of products produced by local suppliers
- O’KEY products are featured in regular catalogues and in dedicated catalogues published twice a year
- Dedicated section at the e-commerce website, direct mailing to core customer base and advertising campaigns to support sales of private label products

*Not including turnover of discounter stores

Hypermarkets: Online Sales

14

In 2015, O'KEY has launched an online sales channel to enhance customer experience and add another revenue stream as the Company develops as a multi-format operator

- O'KEY launches online shopping in line with its strategy to get closer to its customers
- Unrivalled choice: **22,000** SKUs available online
- Advanced online platform with enhanced functionality: creating shopping lists
- Pilot version of mobile application with full online store functionality has been launched
- **5** pick-up points in hypermarkets in Moscow and **4** in St. Petersburg, hassle-free: pick-up takes only five minutes
- Own logistics ensures delivery throughout Saint Petersburg and Moscow
- Structure of the basket online is similar to offline with high share of fresh, meat, fruit and vegetables
- Most of the off-line promo-campaigns are mirrored online
- Average ticket online **2.5-3.0 times** higher then average for hypermarkets
- Potential for expansion in the regions
- Strong growth – total sales in 2016 will increase 10 times vs 2015
- Breakeven by the end of 2016

H1 2016 Results Overview: Revenue

15

- Total revenue increased by 10,3% and net retail revenue grew by 10,0% driven by
 - 5.5% improvement in LFL revenue as a result of the 4.5% increase in LFL customer traffic and 1.0% growth in LFL average ticket due to Company's efforts to improve value proposition, enhance assortment and sales mix and in spite of the weakness in macroeconomic environment and intensifying competitive pressures
 - Development of the discount chain
 - 6.4% increase in the selling area due to the net addition of one hypermarket and 48 discounter stores

H1 2016 Results Overview: Gross Profit

16

- In H1 2016, Group gross profit grew 3.2% y-o-y to RUB 18,667 million, while gross margin contracted by 150 bps to 22.3%
- Dynamic of the gross margin was impacted by:
 - the policy of maintaining competitive prices level and increased share of promo in the sales mix;
 - the effect of the lower gross margin in the developing discounter format;
 - the growth in logistics costs due to the ongoing logistics centralization implemented to improve inventories management, which will also allow the Group to obtain better commercial conditions from the suppliers;
 - substantial decrease in shrinkage as a result of the tighter control for purchasing and writing-off of the goods, working with security companies to improve security during the receipt of the goods and on the selling floor as well as a result of logistics centralization

Group gross margin

H1 2016 Results Overview: EBITDA

17

- Total Group EBITDA declined by 29,1% driven by
 - higher negative contribution from discounter chain (where EBITDA amounted to negative amount of RUB 1,241 million compared to a negative amount of RUB 459 million a year ago) as the discounter chain by the end of the period comprised 48 stores and an owned warehouse in the Moscow region;
 - decline in gross margin in the hypermarkets and supermarkets as the Company introduced competitive pricing and increased promo activities;
 - a 17.7% y-o-y increase in personnel costs attributable to increased headcount in the stores, increase in the salaries of the personnel in the stores in September 2015 needed to maintain traditionally high level of customer service, as well as the development of the discounter chain.
 - In H1 2015, personnel costs in the business segment of hypermarkets and supermarkets declined as a result of the aggressive layoffs in the stores which has led to a certain deterioration in customer service standards
 - higher operating lease costs as a result of the development of the discounter chain as well as the impact of the USD and EUR rate increase on the lease agreements nominated in foreign currencies and the growth in lease payments linked to the turnover of the stores and to inflation mitigated by renegotiating lease agreements nominated in foreign currencies (fixing the currency rates or moving to rubles) and closing inefficient stores.
